

19th September, 1961.

BILBAO

13139 - As recommended.

13108 "ARTAGAN" - As recommended. In view of the satisfactory nature of the General Examination now held the Committee have approved postponement of the Special Survey until June 1962 and I shall be glad if you will inform the Owners accordingly. I acknowledge receipt of your letter of the 5th September, the contents of which have been noted. ?

13137 "CABO MENOR" - as recommended. It is concluded that the safety valves of the boiler were adjusted under steam but please confirm this and state the pressure to which they were adjusted.

13132 "MAR CANTABRICO" - As recommended. Your remarks regarding the oil fuel quick closing sprayer cock have been noted but as the rule requirement regarding remote controls etc. did not come into force until 1950, and as this ship was built in 1930, a condition of class regarding these controls should not be recommended. The machinery class has therefore been continued subject to the donkey boiler not being used until the uptake is repaired and you should issue an amended Interim Certificate without reference to the remote controls.
