Dear Sir,

Motorship "PERICLES"

Further to my letter of the 5th May last and subsequent correspondence, a report has been received of a survey held on this ship during that month at Palermo, from which it is noted temporary repairs were effected on account of damage stated to have been caused through heavy weather.

It is recommended that the bridge front and structure in way should be dealt with at the next drydocking, and that welded repairs to the rudder pintle shaft should be examined afloat before the end of November next.

The vessel's class has accordingly been continued subject to these matters receiving attention as indicated.

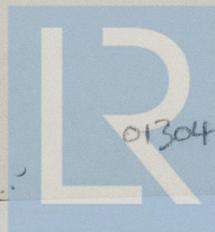

A record of docking 5,54 has meanwhile been assigned.

Yours faithfully,

c.c. Osl.

Assistant Clerk to the  
Classification Committee.
