Water Tube Boilers.

Fitted for oil fuel 3,28 F.P. above 150° F.

The Water Tube Boilers of this vessel became due for Annual Survey in March last, but the Owners' Superintendent Engineer states that it is not desired to maintain the steamer in the Society's Classification.

The Classing Committee had the case before them on Tuesday, 5th instant, and in the circumstances decided to give instructions for the vessel's character to be withdrawn from the Register Book and three dots (...) inserted in lieu thereof, indicating withdrawal of class at Owners' request.
