274 T

builders: Messrs.

Yard No.

engineers: Messrs.

Engine No.

reference: Genoa Report No. 22976

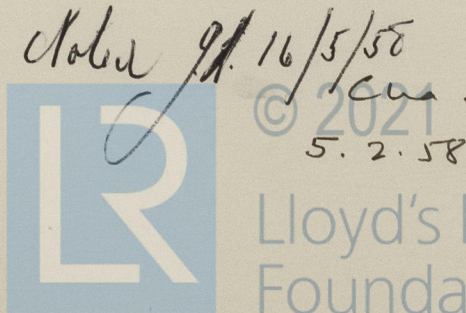

It is submitted that with the 5 bladed bronze propeller fitted the 1-mode 5^{th} order critical speed is calculated to occur at approx. 43 RPM

No gear hammer or rough running is anticipated in going through this critical at steady ahead speeds.

The entry in the L. of E., relating to the 1-mode 4^{th} order critical speed (with the 4 bladed propeller fitted) is no longer applicable.
