S.

Dear Sir,

"BARON MACLAY" (B.C.) Barry Report 25997.

We thank you for your letter of the 19th. instant and in reply thereto have to state that in addition to propeller and sea fastenings a general examination of the main and auxiliary machinery, boilers, steering engine and windlass was made by us.

As regards Hull and Equipment the Annual Freeboard Survey was not due at this time, but the survey carried out by us was equivalent to that required for an Annual Survey except that the watertight doors were not examined or the steering gear chains annealed and tested.

We are, Dear Sir,
Yours faithfully,
THE SURVEYORS,

Per:-

The Secretary,
LONDON.
