Particulars of Classification (which must be inserted precisely as
in Register Book and Supplement)

Surveys must be reported in the terms of the Rules. The nature and extent of Examinations and Repairs (if any) must be stated in detail, the parts examined and their condition being clearly indicated. For Annual, Special or other Condition Surveys the Summary of Examination and Condition on the back of the Report is to be carefully completed and amplified if necessary in the body of the Report. Outstanding items to complete the Survey should be summarised at the end of the Report. The reasons for Repairs must be stated. Repairs on account of Damage (the alleged cause of which must be stated) should be stated from Repairs due to other causes, and, besides being detailed in the body of the Report, should be summarised in the form below. When, at a Special Survey, the Shell and Deck Plating is drilled the results must be reported on Report 8(Dr). Whenever Anchors or Chain Cables are replaced or retested the necessary particulars are to be given on Report 8(Eq) which is to be attached to this Report.

EXAMINATION AND REPAIRS AS PER RULE FOR

GENERAL EXAMINATION - POSTPONEMENT S.S. "D"

Now Done :-

A General Examination for postponement of Special Survey carried out as per authorisation given in London letter abovementioned and in accordance with instruction and requirements as set out in Circular 1959.

Parts of the ship as detailed under the relative headings in tables overleaf examined and general condition of same found such as could, in our opinion, warrant favourable consideration being given to the requested postponement, viz until December, 1962.

In view of ship's age special attention was given to examination of coal bunker spaces, all wood ceiling being removed from open floors and bilges in way of same, and to spaces below engines and boilers.

A number of test holes also made as requested in decks and shell plating, with the object of ascertaining their general condition and in light of notation in the S.R.L. appendix, same showing that excepting for some local wastage and deterioration the ship remains sound and seaworthy.

Has a Survey also been held on machinery of the Ship? Yes.
If so, is the Report sent now, or when will it be sent? Now.

Is Classification Certificate required? If so, to be sent to No.
Has Interim Certificate been issued? Yes.

GENERAL OBSERVATIONS, OPINION AND RECOMMENDATION AS TO CLASS

State clearly what alteration, if any, is suggested to be made in the existing Classification or Survey or other records of the Ship in the Register Book consequent upon this survey; for example:—
"to remain as Classed in the Register Book without fresh record of Docking"; "to remain as Classed and to have record of drydocking 1,55"; or "to remain as Classed and to have record of drydocking 1,55, and the notation of S.S. . . . 1,55".

This ship in so far as now surveyed is, in our opinion, eligible to remain as now classed in the Register Book with fresh record of D.S. 12,61, now and continuing subject to bottom shell plate "A".5 (s.s.) from forward, in way of coal bunker spaces (temporarily repaired) being further examined and dealt with at the Special Survey (by not later than December, 1962).
