QUESTION	ANSWER
<p>With reference to New York report No. 60967, I shall be glad to learn what arrangements are proposed to be made for the Hull condition of craft <i>class</i> to be dealt with.</p> <p>I would add that the Boiler Survey was carried out at Kobe in July, but no Survey was carried out on the Hull.</p> <p><i>mas</i></p>	<p>Date:— 27th September, 1962</p> <p>I understand from the Owners that the openings in the shaft tunnel side plating which were originally made for fitting thermometers have been permanently closed. The Owners do not wish to arrange for a surveyor to attend the ship merely for the purpose of checking this item and they, therefore, request that the necessary verification may be made when next a survey is necessary for some other purpose.</p> <p>© 2021 Lloyd's Register Foundation</p>
