

"NEW YORK MARU"

Kob.1411

Before this case receives consideration IT IS SUBMITTED the Kobe Surveyors be informed that their dates of approval (2.12.52. and 20.12.52.) of the main engine torsional vibration characteristics as stated in their report 4b are not known in this office, and it is requested the position be made clear.

In the case of the sister vessel "YOKOHAMA MARU" a barred speed range was recommended, but this has been omitted in the present case.
