QUESTION

With reference to your memorandum of the 15th May, I shall be glad to learn if you are yet in a position to let me have any further information regarding the Steampipe Survey.

I would remind you that the machinery class of this vessel is at present subject to the port combustion chamber outboard back plate being specially dealt with by the end of this month. When this item has been satisfactorily dealt with the record MBS 3.65 will be assigned. It is concluded that this condition of class will be dealt with at the same time as the Steampipe Survey.

ANSWER

Date:— 22nd June 1965

It is understood that this vessel will arrive at this port at about the end of next week when the Steam Pipe Survey and the condition of class in respect of the port boiler combustion chamber back plate will be dealt with.
