CSM advanced.

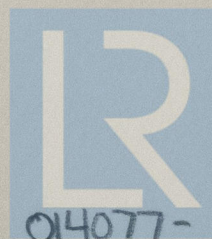

On examination, found cylinder heads of port No. 3 and starboard No. 2 main engine units badly fractured in way of port openings for exhaust valves and air inlet valves.

At this time a complete head and liner assembly fitted to port No. 3 unit and a new spare liner fitted to a spare and previously used head now fitted to starboard No. 2 unit and these considered permanent repairs.

IT IS SUBMITTED that this vessel is eligible to remain as classed, subject as above regarding Item No. (2) but without subject Item No. (1).
