

Enquiry by the Milford Haven Surveyor on behalf of the
Superintendent of the Milford Dock.

It is submitted the Surveyor be requested to advise
the Superintendent of the Milford Dock that this Society has no
records of the weights of vessels, but the Builders of the
trawler "MILFORD QUEEN" have been good enough to supply the
information that the light weight is about 395 tons. This is
the weight with the boiler full (to working level) and fresh
water on board but with no coal or ice allowed for.
