

S.S. "THORA DAN" ex "HOKE SMITH"

R.B. No. 75204

Electrical Installation

The New York Surveyors recommend acceptance for classification subject to the main generator equaliser connections being increased to Rule requirements. The Copenhagen Surveyors now request particulars of the size of cable required.

As the three generators are of equal kilowatt rating and have similar speeds and are reported as having been found satisfactory in operation, it is considered that the size of the equaliser cables fitted could be accepted in this instance.

IT IS ACCORDINGLY SUBMITTED the Copenhagen Surveyors be informed that in view of the three generators being of equal kilowatt rating and having similar speeds, and of the satisfactory report received from the New York Surveyors regarding their operation, no exception will be taken in this instance to the equaliser cables fitted being retained.
