

26th September, 1958.

MAIMO

A" ex "NORDANVIK" 3807 - As recommended.

3804 "OCTAVIA" This ship has today been classed *100A1 together with the appropriate notations recommended by you. I have to point out that when Aalborg Rpt. 4b No. 16905 was given there was a torsional endorsement attached to the main machinery which was removed in the Secretary's letter reference Eng. dated 5th May, 1958, and this should have been stated on page 1 of your Rpt. 4b.

I shall be glad if you will state whether attached fresh water and bilge pumps are fitted to the Main Engines as stated in the above mentioned Aalborg report.
