action taken or recommended should be described fully under "defects & repairs". When any part has been subjected to pressure test this should be stated.

date of the next Special Survey. Where repairs have been effected or it is considered that re-examination or repairs should be made before that date the circumstances and

The condition of any item is to be described as "good" only when it has been examined, found or placed in good condition and is considered to be acceptable until the due

I have surveyed the above-named ship in accordance with the Rules for **General Examination and S.R.L.**

GENERAL EXAMINATION for deferment of the Special Survey (~~to~~<sup>to</sup> not later than October 1966, now carried out at the request of the Owner's Representative — see Report 8 (PS). It was stated that the vessel was surveyed on drydock about five months ago at Genoa. The only cargo tanks available for examination at this time were Nos 5 & 6 wings — all other tanks contained oil cargo. In my opinion, this vessel is in satisfactory condition and eligible to have the Special Survey, due 10-6<sup>5</sup> deferred to not later than October 1966.

S.R.L. N°-247.

Nothing was done at this time regarding the indented shell plating.

The items now surveyed are detailed on this report. All were found or placed in good condition unless otherwise stated. I recommend, therefore, that this ship remain as classed ~~with~~/without fresh record of dry docking subject to any outstanding condition of class being dealt with as previously recommended.

(Where conditions of class are recommended to be retained, imposed, amended or deleted, particulars must be stated above and in the interim certificate.)
