

Hildina

Steam Trawler "CAVENDISH".

This vessel, built by Messrs. J.P. Rennoldson & son in 1918, was constructed under the survey of the British Corporation to plans mutually approved by Lloyd's Register and the British Corporation for Castle Type Trawlers.

In 1920 the new Owners desired the classification of this Society, and the scantlings were verified by the Surveyors with the plans of the Castle Type Trawlers, and the vessel examined on a slipway and found in good order, and she was classed by this Society 100A1 "Steam Trawler".

In the circumstances it is submitted for the consideration of the Committee that the Special Survey No.1 might be reckoned as becoming due in December 1922, i.e. four years after the date of build which is given in the Register Book as 1918.
