Downington Iron Works,  
Downington, Pa.

Gentlemen:

Pennsylvania S.B. No. 116,  
Exhaust Gas Fired Boiler

I duly received your letter of the 12th instant,  
enclosing following final plans:

- C-853
- C-856
- C-1452

and with regard thereto, I have to state that provided the steel be made at approved works and tested in accordance with the Rules, and the tensile strength of the shell and butt straps be not less than 60000 lbs., and provided the boiler be built in accordance with the plans in accordance with the Rules and to the entire satisfaction of the Surveyor under the usual conditions of survey and testing, the same will be approved for the intended working pressure of 125 lbs. per square inch.

The Safety Valve area is approved subject to a satisfactory accumulation test.

One copy of the plan has been signed and is returned herewith. All other copies have been destroyed.

Yours very truly,

Senior Engineer Surveyor.
