

The Cunard Steam-Ship Company Limited.

S.S/ "M.V. "BRESCIA". "

At Famagusta.

Date December, 23th, 1951.

's Survey.

2Florette.

At the request of Messrs Orphanids & Murat
 d's agents at Famagusta I proceeded on board the steel screw motor
 "Florette" on the slip-way at Famagusta to survey the following:-
 water fittings, ships side valves, tailshaft, propeller, & stern gland.

My report on the above is as follows:-

The main injection mounting was cemented over
 I recommend that this valve be removed for further examination of
 condition of the ships bottom.

The auxiliary sea injection to be opened up
 overhauled as this fitting was seized.

The shaft, couplings, gland & propeller were in
 order, the wear-down of the shaft was .090"

Surveyor.

Certificate No. 87865.
