

s.s. "ADMIRAL HAMILTON"

The Hull and boilers of this vessel have been built under the survey of the Society's Surveyors at Sunderland for classification with this Society.

The engines have been constructed under the supervision of the British Corporation Surveyors and the certificate issued by that Society is attached herewith.

As it is provided in the Committee's circular letter dated 6th March 1918 that, in such cases, this Society will issue the machinery certificate with the notation LMC with date in red, it is submitted that this vessel is now eligible for the record of LMC 5,19.
