

Wood Motorship "C. F. H."

Mr. Collinson rang up from Plymouth this morning pointing out that previous surveys on this vessel have been carried out by Mr. Robertson.

The Owners' letter of the 23rd instant was shown to Mr. Robertson in this Office this morning and he suggested that, as his commitments render it impossible for him to deal with the case within the next few days, the Owners should be asked whether it is possible to submit the vessel to survey at some later date within the next few weeks.
