

S.S. "KARACHI".

This vessel was built in 1918 under the survey of the British Corporation to plans mutually approved by this Society and the British Corporation for the "Castle" type of Trawlers.

The vessel came under the survey of the Society's Surveyors at Hull from June to September, 1920, and on the 17th September, 1920, she was classed 100A1 by the Committee, the vessel having been converted into a cargo carrier.

The question has now been raised as to when the Special Survey No.1 should be reckoned to become due.

It is submitted the Hull Surveyors should be requested to state whether the survey held by them in 1920 could in their opinion be considered as complying with the requirements of the Special Survey No.3, in order that the Special Survey No.1 may be dated from the completion of their survey.
