

"MOORPOUT"

F.E. Rpt. Ips. No. 114935

It is submitted before this case receives the consideration of the Committee the First Entry Report be returned to the Surveyor for insertion of particulars of water ballast tanks, overall length, extreme breadth over belting and scantlings of double bottom and inner bottom plating.

He should also be requested to forward the approved plan of the watertight bulkheads.

He should be informed it is suggested that in all future similar cases Form Rpt. 1 and not Form No. 1C be used in reporting this type of vessel, as on the latter no provision is made for the above particulars.
