LLOYD'S REGISTER OF SHIPPING

Oslo, 21st November 1958.

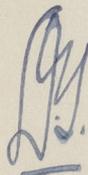

"SUNNY PRINCE"

Refer Oslo Surveyors' letter of 21.11.58 expressing Owners' disappointment that for the SPECIAL SURVEY (C), due 9,56, commenced Ham. 9,56 and completed Ham. 3,57 the notation of 'SS 9,56' was assigned instead of 3,57.

SUBMITTED the Owners, through the Surveyors, be informed in reply that when the Hamburg report of the part Special Survey held there August/September, 1956 was under review here, it was considered that the principal (not greater) part of the Special Survey had then been held, and in accordance with the Rules (B.804) the 9,56 date was deferred for completion. The report of the completion part of the Special Survey held at Hamburg 3,57 did not modify the previously recommended 'SS 9,56' notation which was accordingly recommended and assigned 9,56.

SUBMITTED too the Surveyors be informed it is concluded that they pointed out to the Owners the reason why the internal examination of tanks is considered to be the principal part of a Special Survey referred to in B.804 of the Rules since an interval of 5½ years might elapse before the tanks examined 9,56 are again examined, which Owners will appreciate is quite outside the requirements of B.802 of the Rules.

With reference to the last sentence of the first paragraph of the Surveyors' letter, it is submitted they be acquainted with the purpose of an Interim Certificate (refer B.1303 of the Rules) for their guidance in handling future similar cases.
