Your Ref. Class(n)

Dear Sirs ,

Tug "SIDI BELYOUT "

We duly received your letter of 2nd.inst. in connection with the Certificate issued by our Surveyor following his recent survey of this vessel's boiler.

The question of the adjustment of the safety valves was taken up with Mr. Bachellerie who states he made an error in his certificate .The safety valves were effectively adjusted to the approved working pressure of 220 lbs per square inch and not as stated in his certificate .

We are arranging to rectify the Certificates n°38-S-53 here and would request you to make the change in your copy.

Mr. Bachellerie confirms that the oil fuel and fire extinguishing installations were examined by him under working conditions .

Yours faithfully.
