

"ALFTANES"

The attached letter dated 19th instant was discussed with Mr. McMillan over the telephone today. He made it quite clear that the Liquidators were guaranteeing the fee for the survey referred to in his letter, and that, he thought there was every likelihood of the outstanding British Corporation fee being paid in the long run, seeing that if the prospective Canadian purchasers bought the ship they were asking for a clean certificate of class.

He promised, however, to endeavour to get a further assurance from the Liquidators, and asked that we should defer our reply until hearing further from him.
