BRITISH COLUMBIA

1519 MARINE BUILDING  
VANCOUVER, B.C.

28th December, 1943.

The Secretary,  
Lloyd's Register of Shipping,  
London, E. C. 3.

Dear Sir:

Converted Tanker - S.S. "MOUNT ROYAL PARK"  
Vancouver Report No. 5994.

We beg to confirm our cablegram of the 28th instant  
reading as follows:-

"PLEASE DEFER ACTION ON REPORT 5994 UNTIL RECEIPT OF AMENDED  
ELECTRICAL REPORT NOW IN TRANSIT"

The amended Electrical First Entry Report referred  
to is attached hereto and we shall be pleased if you will kindly substitute this  
for and cancel the original Report forwarded to you on the 7th instant.  
The certificates, test sheets and "As Fitted Drawing" attached to the  
original Report should now be attached to the new Report.

We also enclose a copy of an amended Machinery Interim  
Certificate B1 which has been issued in this case and have to request that  
you will kindly substitute this for the copy of the original Certificate  
which was attached to the Machinery First Entry Report.

After consultation with the Principal Engineer Surveyor,  
Mr. John S. Heck, it was decided that our original recommendation that a reserve  
be made against the class of this ship, viz: "subject to electrical installation  
being specially examined before the end of September, 1945", should be  
modified in accordance with the terms of the new Certificate now issued, in  
view of the use of Polyvinyl Chloride insulated cables above deck contrary
