

Fishing Smack "Beaconsfield" 75 Tons  
built at Peterhead and recommended  
for the S.A.I. Class "for Fishing purposes  
only".

This vessel has been built in  
accordance with the approved midship  
section attached.

The anchors are somewhat lighter than  
required by the rules for a sea going vessel,  
and the chains are 60 fathoms instead  
of 120 fms but they are  $4\frac{1}{16}$  instead of  $1\frac{1}{16}$ .  
It is found upon enquiry that the  
equipment is equal to that usually  
supplied for Trawlers of this size,  
and it is submitted merits the  
approval of the Committee.

In which case the vessel would  
be worthy to be Classed S.A.I. "for  
Fishing purposes only"
