General Remarks—Statement and Date of Repairs.

This is a well finished vessel of good material & workmanship also particularly well fastened. — Has a flared out Clipper bow with full raked head & round stern formed without transoms timber being carried all round & secured with Hooks at fore end of vessel also Gear deck about 3ft in height Sheathed with Muntz Metal No 24 26 & 28 oz plain over bottom plank to 10ft forward and 11ft aft

Bower chains have been carefully tested to 27 tons each & marked as capable to rule section 73

Between long & short floor heads there is one through bolt in each timber carried beyond the limits of the rules & in addition the timber streak has one through bolt in each frame driven through Garb streak also beyond the limit of Rule the above fastening may not be according to the strict letter of the Rule for Bilge bolting but is according to the precedent allowed in the case of the Peruvian I & on that account has not been insisted upon

Surveyed specially while under construction —

Copper fastened in bottom throughout to top of lower deck beams

If Sheathed, Doubled, Felted, or Coppered Yellow Metal When last done May 1849

I am of opinion this Vessel should be Classed 10 A 1
