3.3 "Armida"

11
The boilers of this vessel are to be
replaced by one new Boiler
being by The North Eastern Marine
Engineering Co., & one Boiler
from the wreck of the
"Adorna".

The latter Boiler has now been
inspected by The Aberdeen Surveyors
report that it is in excellent
condition. There are some slight
deteriorations in the shell plating
but these do not in any way affect
the efficiency of the Boiler, which has
satisfactorily withstood the
hydrostatic pressure & found light.
The Surveyors recommend that
the Boiler should be approved
on the original working pressure
of 150 lbs per sq inch, & this recommendation
be submitted for approval.

It might be added that the Boilers
of the "Adorna" were built under
a special survey in 1910.
