

Barque "Anna Elisabeth" 700 Tons -

Built at Amsterdam in 1870 by Mr. Meursing, on his Patent Principle -

She is similar in Construction to the Ship "Baron van Pallandt van Rosendaal" (Classed S.A. / Expt. B.S.) having an Iron Frame, Plated, ~~and~~ planked, and fastened with Screws &c as described in the Report -

I joined Mr. Borchers in holding two Surveys on this vessel during her progress while building, and reported the result to the Committee -

Mr. Borchers states that my recommendations have been complied with, consequently it is respectfully submitted, that she is worthy of the Committee's favorable consideration for the Proposed Class. Provided that the Statement respecting the Anchors and Chain Cables be deemed satisfactory -

January 10th 1870
