ANSER

5th December 1894

The Secretary
London,

Sir,

In reply to your classification letter re the steamer "Monston Grange", I beg to say that the donkey boiler is being made by the builders of the vessel, Messrs Workman Clark & Co & under special survey. It has not yet been arranged at what port or when the boiler will be fitted on board, but due notice will be given.

A donkey boiler was made for the vessel some time ago but was not fitted because it had not been built under the supervision of the Board of Trade Surveyors, & the Owners desired a passenger certificate for the vessel. It is now intended to fit this boiler as one of the main boilers on the steamer "Castago Nova" now under survey in this port.

Law Sir

Your obedient servant

A. L. Jones
