The Surveyors
Liverpool

Dear Sirs,

I beg to inform you that the new vessel "Manhattan", Messrs Barland & Wolffs C, has left this port in tow for Liverpool, to have the engines and boilers fitted by Messrs Fawcett Preston & Co.

In order to complete the survey on the Hull, the weather decks and tunnels have to be tested with a hose, the deck pumps and watertight doors tested and the engines and boilers permanently closed over.

The electric lighting has also to be completed

I am,

Dear Sirs

Yours faithfully,
(Signed) James Turpin
