Report

Apr

No.

2625

The remarks of the Chief Surveyor are desired on this case for the consideration of the Classing Committee.

("The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement."—Extract from Sub-Committee's Report, 24/5/92.)

Nature of Survey

Ins & B Survey

It is submitted that before this case receives the consideration of the Committee it should be pointed out to Mr Rule—who holds the survey jointly with the Appraiser Surveyor—with reference to the sketches just received showing the drilling of the shell plating that the shearstroke is  $\frac{3}{16}$ " less & all the remaining strokes  $\frac{1}{16}$ " less <sup>amidship</sup> than their original thicknesses. and in view of this he should be requested to state whether the results of the drillings may be considered as representing the general condition of the plating <sup>whether they</sup> or have been taken in locally wasted places.
