

COPY.

25th October 1898.

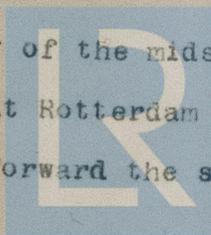

to acquaint you that I am in receipt of a letter from
Society's Surveyors at Rotterdam in which it is stated that the
"TIDEMAND" is about to be towed to your port where she
is to be submitted to the requirements of the 3rd Special Survey No.3
due in October 1896, and I shall therefore be glad if
you will give the case the necessary attention.

In connection with this case, I have to acquaint you that the
Special Survey No.3 should be carried out in accordance with
the requirements of the 2nd Special Survey No.3 and the plating
is to be drilled to ascertain its ~~depth~~ 10 fathoms of stream
was placed on board the vessel at Valparaiso in July 1896 but
was not tested in accordance with the rules and the Owner
has not had this done when the Special Survey was held. The
requirements of the inspection in question remain to
be carried out with except the removal of the close ceiling from the
deck to within 15ft of the foremast and the examination of the
structure of the vessel in way of the same.

A first entry report and a copy of the midship section were

sent to the Society's Surveyors at Rotterdam on the 25th

I have written to them to forward the same on to you for
