

S. S. "Providence"

is submitted that the boiler of this vessel was made by Messrs. Riley Bros. Stockton under special survey for a working pressure of 175 lbs per sq. in. but the engines have not been constructed under survey & the Engine Builder, who is the Owner of the vessel, has not consented to have them examined by a Surveyor of this Society although requested to do so in the Secretary's letter of the 25th ult. The machinery is therefore not eligible to be Classed in the Register of this Society.
