Extract from Bristol Letter dated 3/9/77

Herewith I send Report of Survey for New  
Bergue "Gertrude" built and Owned by Mess<sup>rs</sup>  
C. Hill & Sons of Bristol; Her Frames have  
been fastened with Galvanised Iron Bolts,  
it was first commenced, with common  
Iron, but have all been refastened as named  
above.

Mess<sup>rs</sup> Hill are anxious she should be  
Clasped One Year for Mixed Wood Material  
but I told them there was not sufficient  
12 Years wood to entitle them to ask for  
it, of course the Committee can decide.
