Barrow-in-Furness

28th March 1895

*The Secretary
London*

Sir:

Enclosed I beg to forward a letter received from Messrs. R. Williamson & Son with reference to the equipment in the New Steel Bk. "Marian" from which it will be seen that 90 fathoms of 11" Manila hawser has been supplied instead of 12" as required by Table 22. Mr. Williamson has put on board a 4" Steel Wire rope (Second hand) with No Certificate to compensate for the deficiency in the Manila Hawser, and he asks that the same may be submitted for the consideration of the Committee. I may say that I examined the hawser in question carefully and made it

it 11" and not 11½ as stated in the enclosed
letter and recommended that a 12" hammer
should be supplied as required -
The Equipment letter for this vessel is E.
Awaiting an early reply.

I am Sir
Your obedt. Servant -
Jm Johnston
