Dear Sir

In reply to your letter of the 18th ult. respecting the steel schooner "Olwen",--There has been some delay in beginning this survey owing to some questions as to the new steel bulkhead which is required to be fitted to this vessel--this is to day agreed to & the survey will begin at once.

With regard to the enquiry contained in your letter of the 21st May. as to whether the Motor Engine ^{of this vessel} is to be Claped--The Master (Owner) is still of opinion that this Motor is built to our requirements, & by Campbell of Halifax--but no reports of this alleged survey has reached here--& without your instructions, no action is taken as regards making such a survey here.

I am dear Sir
Yours Faithfully
MacWilliam

DUB 99-0240

Referred to the Chief Ship Surveyor
and the Chief Engineer Surveyor.

FAW

Also for Mr. S. A. Hill to note:
