Reference

Sir

Enclosed please find a letter from the new Owner Master of the steel Schooner "Olwen" No 72 in the Register Book, which letter is in reply to my action in pointing out that the vessel is overdue for Special Survey No 2, and for the consideration of the Committee. I may add that my inspection of the vessels Bottom on No 1 slip revealed no defect - since then the vessel ^{on the 13th inst} has been laid up (afloat) presumably for the purpose of preparing Plans for Alteration & in connection with the installation of the Auxilliary Oil Engine.

I am Sir

Your Obedient Servant
Macwilliam

The Secretary
