Charles Graham Esq

Sir I am in receipt of your letter of yesterday returning the report on the "Amazon" I regret that I should have made such an omission as not to mention the Points of the upper Deck being Masted Metal and also the recommendation is to clip - the Journals are sent by the Builder to be stringy bark, which was purchased in Sweden is being used in Ships of the highest grade. They are of excellent quality I should say superior to English Oak although of a ~~lower~~ ^{lighter} weight. I have not seen much used here.

I am Sir your obt Servant
David Wright
