

Dundee

22nd October 1891

A. E. Kyddell & Harry Clarke

G. to Wood Esq. Owner
Survey the Iron & Steel 4 masted Bk
"Mayhill" of Liverpool; 2121-1988 -
and 3027 tons register: No 1154 in the
Register Book: Name, Master; while
afloat in the Victoria dock Dundee
on September 16th 1891 and following
dates, for the purpose of ascertaining
the nature and extent of damage
stated to have been sustained
through shipping a heavy sea
on the 8th June 1891 when in the
South Pacific ocean on a voyage
from San Francisco to Havre.
For further particulars see log book.
An examination found the main
deck set down for a length of about
thirty two feet on starboard side in
way of main hatch.
Five whole beams and two half beams
in main deck bent on starboard side

DUN118-0282 (1/3)

Two ladder stanchions and one plain stanchion at after end of main hatch bent and broken.

Seven bulwark stanchions loose at head and spur and two broken, all on port side aft.

Main spindle of port capstan loose in sole piece.

The undersigned recommended that all beam knees on each side in way of damage be carefully examined. Five whole beams and two half beams in main deck be cut adrift, removed, paired and replaced.

The steel deck in way of bent beams be cut adrift and rivetted and recaulked after beams are replaced.

Two ladder stanchions and one plain stanchion at after end of main hatch be repaired and replaced.

Seven bulwark stanchions on port side aft to be rivetted at head and spur and two repaired and rivetted in place.

Main deck planking, starboard capstan, life rails round mizen mast and other deck fittings in way of damage to be removed for access and replaced as before. Main deck planking to

to be renewed where necessary and
 all parts disturbed to be recaulked.
 Port capstan on main deck aft be
 taken ashore, overhauled, main
 spindle keyed in sole piece and
 the whole replaced to place the
 vessel in as good and efficient
 condition as before the casualty.
