Timbering.—The Space between the Floor Timbers and Lower Foothooks is \sim Inches. The Space between the Top-Timbers is \sim Inches.

The Floors consist of Gum plate

The First Foothooks of Plated Angle iron

The Second Foothooks of Plated Angle iron

The Third Foothooks and Top Timbers of Plated Angle iron

The Shifts of the First and Second Foothooks are not less than 1 1/2

N. B. When less than prescribed by the Rule, state how many.

The rest of the Shifts of the Frame are \sim

The Frame is \sim squared from the First Foothook Heads upwards, and \sim free from sap, and from thence downwards, the frame is \sim

The alternate Frames are \checkmark bolted together to the Gunwale.

N. B. If not, state how bolted.

The Butts of the Timbers are \sim close together; their thickness not less than \sim of the entire moulding at that place.

The Frame is \sim chocked with \sim Butt at each end of the chock.

The Main piece of Rudder is Cork

The Main Keelson is Gum Plate and \sim free from all defects.

The Main piece of Windlass is Greenheart

The Stem, and Stern Post, consist of Scall and Cork The Transoms, Aprons, Knight Heads, and

Hawse Timbers of Scall and Cork Deadwood, of Scall and are \sim free from all defects.

The Deck and Hold Beams consist of Scall and Cork The Breasthooks of Gum Plate The Knees of Velveteen

Planking Outside.—From the Keel to the Height defined in Note to Table A the Plank is Scall

From the above named Height to the Light Water Mark Scall

From the Light Water Mark to the Wales Scall

The Wales and Black-strokes are Scall The Topsides Scall

The Sheer-strokes and Plank-sheers Scall The Water-ways Scall

The Decks Scall and Cork State of Scall

The Shifts of the Planking are not less than 6 Feet \sim Inches. N. B. If less than prescribed by the Rule, state whether general

or partial, and if partial, in what part of the Ship. The Planking is wrought Scall between, and without step-butting

Planking Inside.—The Limber-strokes and Bilge-strokes are Scall

The Ceiling, Lower Hold, and between Decks Scall Shelf Pieces and Clamps \sim

Fastenings.—To Hold Beams Scall Fitted to Framing, a Striker on top

Connected side by angle iron riveted to frame, angle iron on the frame

Deck Beams Scall

Number of Breasthooks 5 Pointers 5 Crutches 5

Butts End Bolts are of Scall in the Bottom, and Scall Bolt in each Butt End through and clenched.

Bilge and Limber Strakes Scall bolted through and clenched. Treenails of Scall How Made Scall

Thickstuff over Double Floors Scall bolted through and clenched. General Quality of Workmanship Scall

We certify that the above is a correct description of the several particulars therein given
