Particulars of Repairs and Examination

(State clearly the cause of Repairs if any, and in detail, the nature and extent of Examinations and subsequent Repairs. Repairs on account of Damage should be separated from

Repairs due to other causes. State also the dates and initials of any letters respecting this case.)

This vessel having been ashore in the Frith of Clyde she has been placed in dry dock in order to ascertain damage. Found the propeller shaft much worn down the Engines having been worked astern while the vessel was aground. Propeller shaft drawn brass liner filed up and new lignum vitae fitted in bushes. The water having found its way to the Engine room and stroke rods recommended Engines to be opened for cleaning and examination.

Bridge suction pipe having been split open and cut a new one has been fitted.

All parts of Machinery, examined and found in good order, including Sea cocks, pipes & connections.

Main and Donkey boilers examined throughout and caulked where necessary. All mountings examined. Safety valves adjusted under steam to working pressure.

General Observations, Opinion, and Recommendation:— The above mentioned

(State clearly what alteration, if any, is suggested to be made in the existing notification of the vessel's machinery in the Register Book, consequent upon this survey.)

vessel's Machinery is now in my opinion in a good and efficient working condition and eligible to be noted in the Register Book: L.M.C. 3.87.
