## Particulars of Repairs and Examination

(State clearly the cause of Repairs if any, and, in detail, the nature and extent of Examinations and subsequent Repairs.)  
 Repairs on account of Damage should be separated from Repairs due to other causes. State also the dates and initials of any letters respecting this case.  
 Did the Surveyor personally go inside each Boiler separately (including the Donkey Boiler, if any), and make a thorough examination at this time?   
 If this was not done, state for what reasons?   
 And what parts of the Boilers could not be thus thoroughly examined?   
 Also what special means, in the absence of internal examination, were adopted by the Surveyor to assure himself of the thorough efficiency of those parts of each Boiler?

### Docking Survey

When the vessel was on slipway all the sea connections were examined externally and found in good order.

New blades fitted to the propeller boss.

General Observations, Opinion, and Recommendation:— As far as can be ascertained by the above examination the machinery appears to be in good order and is in my opinion eligible to remain as classed.
