 Working Pressure, Donkey Boiler lbs.; Owners City of Liverpool Steam Navigation Co. Ltd Port Liverpool
 Last Survey No. 100A1 5.88 Class of Vessel and Machinery 100A1 5.88
 (As in Register Book.)

Particulars of Repairs and Examination

(State clearly the cause of Repairs if any, and, in detail, the nature and extent of Examinations and subsequent Repairs.)

Repairs on account of Damage should be separated from Repairs due to other causes. State also the dates and initials of any letters respecting this case.

Did the Surveyor personally go inside each Boiler separately (including the Donkey Boiler, if any), and make a thorough examination at this time?

If this was not done, state for what reasons?

And what parts of the Boilers could not be thus thoroughly examined?

Also what special means, in the absence of internal examination, were adopted by the Surveyor to assure himself of the thorough efficiency of those parts of each Boiler?

Docking Survey

This vessel has been placed in dry dock at which time all the sea connections as well as the propeller and fastenings were examined and found in good order.

General Observations, Opinion, and Recommendation:— As far as can be seen this vessel's machinery appears to be in good order and is in my opinion eligible to remain as classed in the Society's Register.

(State clearly what alteration, if any, is suggested to be made in the existing classification and notification of the vessel's machinery in the Register Book, consequent upon this survey.)
