Last Survey No. \_\_\_\_\_ Port \_\_\_\_\_  
 Particulars of Examination and Repairs (if any) Limit on Thrust

(Periodical Surveys, when held, must be reported in detail and seriatim in the terms of the Rules. State clearly the cause of Repairs, if any, and, in detail, the nature and extent of Examinations and subsequent Repairs. Repairs on account of Damage (the cause of which must be stated) should be separated from Repairs due to other causes; and besides being detailed in the body of the report, should be briefly summarised at the end of the report. State also the dates and initials of any letters respecting this case.)

Did the Surveyor personally go inside each Main Boiler separately and make a thorough examination at this time? Not due

Do. " Donkey " " " "

If this was not done, state for what reasons? \_\_\_\_\_

And what parts of the Boilers could not be thus thoroughly examined? \_\_\_\_\_

Also what special means, in the absence of internal examination, were adopted by the Surveyor to assure himself of the thorough efficiency of those parts of each Boiler? \_\_\_\_\_

Did the Surveyor examine the Safety Valves of the Main Boiler? \_\_\_\_\_

At what pressure were they afterwards adjusted under steam? \_\_\_\_\_

Did the Surveyor examine the Safety Valves of Donkey Boiler? \_\_\_\_\_

To what pressure were they afterwards adjusted? \_\_\_\_\_

If the Survey is not complete state what arrangements have been made for its completion? \_\_\_\_\_

Examined the Thrust shaft and found a groove about 2 inches deep & 1 1/2" long and between two of the Thrust collars. This is the point where the flaw had been detected, but there is no sign of a flower crack at the bottom of this groove and in my opinion the shaft is in a safe working condition.

The Thrust shaft is 16" diameter between the rings, according to the scales it need not have been made larger than 14 1/8".

General Observations, Opinion, and Recommendation:— As far as seen the machinery of this vessel is in a safe working condition and eligible in my opinion to remain as classed and to have her name removed from the limited list

(State clearly what alteration, if any, is suggested to be made in the existing classification of the vessel's machinery in the Register Book, consequent upon this survey, and also any alteration required to be made in the records of the vessel's machinery, boilers, working pressures, &c.: thus, for example, B.S. 1, 01, B.&M.S. 1, 01 or S.L.M.C. 1, 01, 140 lb., F.D., &c.)
