

L. S. "Egerow"

It is submitted that (as this vessel, when the sketch was forwarded, for the approval of the Committee, was stated to be under 400 tons under deck and the scantlings were approved accordingly, whereas now it is found she is 414 tons, and that most of the scantlings and equipment are deficient, Mr Purdie should be requested to state, on what grounds he recommended this vessel to be classed K O A 1, and why he failed to draw the attention of the Committee in his report, to this important departure from the requirements of the Rules.
