

Recd 11. 3. 75

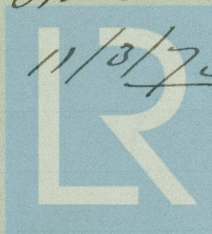

J. S. Egeron

Ans 11. 3. 75

It is submitted that the comparison of scantlings required by the Rules in the case does not indicate the deficiencies, for the guidance of the Committee, and that a report should be prepared showing the correct scantlings as required by the Rules for the tonnage of the vessel, together with the requirements for the cables and Anchors, and any remarks which can guide the Committee in dealing with the claims of this vessel for classification under the Rules laid down for Composite vessels.
