

"Persian Monarch"

In reference to the Surveyors submission dated 7/4/81 on this case, the question arose while it was under consideration by the General Committee whether it really is desirable to close permanently the freeing Boats ^{and scuppers} of these and similar vessels in view of the fact that the arrangement is for carrying Cattle in a satisfactory manner -

It was suggested that the Surveyors should reinspect the vessel "Assyrian Monarch" lying in the Millwall Dock and then report their views for the consideration of the Committee.

The Chief Surveyor is requested to be guided accordingly
