

Glasgow  
31<sup>st</sup> December 1884

Thomas J. Dodd & Andrew C. Heron

— — — — —  
— — — — — have finally examined  
the hull machinery and  
equipment of the Iron screw  
Steam Cruiser "ΕΥΡΩΤΑΣ"  
("Eurolus") built under their  
inspection at the Works of  
Messrs A. M<sup>r</sup> Millan & Son  
of Dumbarton, and Messrs  
Scott & Co of Greenock, for  
the Royal Hellenic Government.

The various clauses  
of the Contract and Specification  
with reference to her construction  
have been carried out, and the  
workmanship and materials  
are good.

The vessel was  
satisfactorily tried under steam  
for six hours, and attained  
a speed of 11 knots on the trial.

mile a mean speed of 10.02 knots.  
(the mean of six runs.)

The sailing qualities  
were also tested and found to  
be satisfactory.

We therefore recommend  
the payment of the fourth or  
final instalment.

J. J. Langford.

This is, also, to certify that  
the enclosed is a copy of the list  
of Ammunition & stores forwarded  
from the Fleet Commr. for  
general information; and that  
weight representing these stores  
have been placed on board in  
their proper places.

J. J. Langford.
