The Secretary
London

Sir

In reply to your letter of the 20th inst. regarding my report on the Steamer Clant Maelachlan, I beg to state that the forward bilge sections are carried through the bunkers and protected with wood casings.

The length of the stern bulk is 7' 8" and the tensile strength of the hull plates of the double boiler range from 27 to 32 tons, Ingal. Test. These items were omitted from my report.

I am Sir,

Your obedient servant

A. M. Grant
